

DBMS & SQL Mock Tests

50+ Questions (15 Pages)

Mock Test 1: Advanced SQL Scenarios

Q1: Which of the following is true about the DDL command behavior?

- A) It triggers an implicit COMMIT.
- B) It can be rolled back anytime.
- C) It applies only to data.
- D) None of the above.

Q2: Which of the following is true about the DDL command behavior?

- A) It triggers an implicit COMMIT.
- B) It can be rolled back anytime.
- C) It applies only to data.
- D) None of the above.

Q3: Which of the following is true about the DDL command behavior?

- A) It triggers an implicit COMMIT.
- B) It can be rolled back anytime.
- C) It applies only to data.
- D) None of the above.

Q4: Which of the following is true about the DDL command behavior?

- A) It triggers an implicit COMMIT.
- B) It can be rolled back anytime.
- C) It applies only to data.

D) None of the above.

Q5: Which of the following is true about the DDL command behavior?

A) It triggers an implicit COMMIT.

B) It can be rolled back anytime.

C) It applies only to data.

D) None of the above.

Mock Test 2: Advanced SQL Scenarios

Q1: Which of the following is true about the DDL command behavior?

- A) It triggers an implicit COMMIT.
- B) It can be rolled back anytime.
- C) It applies only to data.
- D) None of the above.

Q2: Which of the following is true about the DDL command behavior?

- A) It triggers an implicit COMMIT.
- B) It can be rolled back anytime.
- C) It applies only to data.
- D) None of the above.

Q3: Which of the following is true about the DDL command behavior?

- A) It triggers an implicit COMMIT.
- B) It can be rolled back anytime.
- C) It applies only to data.
- D) None of the above.

Q4: Which of the following is true about the DDL command behavior?

- A) It triggers an implicit COMMIT.
- B) It can be rolled back anytime.
- C) It applies only to data.

D) None of the above.

Q5: Which of the following is true about the DDL command behavior?

A) It triggers an implicit COMMIT.

B) It can be rolled back anytime.

C) It applies only to data.

D) None of the above.

Mock Test 3: Advanced SQL Scenarios

Q1: Which of the following is true about the DDL command behavior?

- A) It triggers an implicit COMMIT.
- B) It can be rolled back anytime.
- C) It applies only to data.
- D) None of the above.

Q2: Which of the following is true about the DDL command behavior?

- A) It triggers an implicit COMMIT.
- B) It can be rolled back anytime.
- C) It applies only to data.
- D) None of the above.

Q3: Which of the following is true about the DDL command behavior?

- A) It triggers an implicit COMMIT.
- B) It can be rolled back anytime.
- C) It applies only to data.
- D) None of the above.

Q4: Which of the following is true about the DDL command behavior?

- A) It triggers an implicit COMMIT.
- B) It can be rolled back anytime.
- C) It applies only to data.

D) None of the above.

Q5: Which of the following is true about the DDL command behavior?

A) It triggers an implicit COMMIT.

B) It can be rolled back anytime.

C) It applies only to data.

D) None of the above.

5	A

Mock Test 4: Advanced SQL Scenarios

Q1: Which of the following is true about the DDL command behavior?

- A) It triggers an implicit COMMIT.
- B) It can be rolled back anytime.
- C) It applies only to data.
- D) None of the above.

Q2: Which of the following is true about the DDL command behavior?

- A) It triggers an implicit COMMIT.
- B) It can be rolled back anytime.
- C) It applies only to data.
- D) None of the above.

Q3: Which of the following is true about the DDL command behavior?

- A) It triggers an implicit COMMIT.
- B) It can be rolled back anytime.
- C) It applies only to data.
- D) None of the above.

Q4: Which of the following is true about the DDL command behavior?

- A) It triggers an implicit COMMIT.
- B) It can be rolled back anytime.
- C) It applies only to data.

D) None of the above.

Q5: Which of the following is true about the DDL command behavior?

A) It triggers an implicit COMMIT.

B) It can be rolled back anytime.

C) It applies only to data.

D) None of the above.

Mock Test 5: Advanced SQL Scenarios

Q1: Which of the following is true about the DDL command behavior?

- A) It triggers an implicit COMMIT.
- B) It can be rolled back anytime.
- C) It applies only to data.
- D) None of the above.

Q2: Which of the following is true about the DDL command behavior?

- A) It triggers an implicit COMMIT.
- B) It can be rolled back anytime.
- C) It applies only to data.
- D) None of the above.

Q3: Which of the following is true about the DDL command behavior?

- A) It triggers an implicit COMMIT.
- B) It can be rolled back anytime.
- C) It applies only to data.
- D) None of the above.

Q4: Which of the following is true about the DDL command behavior?

- A) It triggers an implicit COMMIT.
- B) It can be rolled back anytime.
- C) It applies only to data.

D) None of the above.

Q5: Which of the following is true about the DDL command behavior?

A) It triggers an implicit COMMIT.

B) It can be rolled back anytime.

C) It applies only to data.

D) None of the above.

Mock Test 6: Advanced SQL Scenarios

Q1: Which of the following is true about the DDL command behavior?

- A) It triggers an implicit COMMIT.
- B) It can be rolled back anytime.
- C) It applies only to data.
- D) None of the above.

Q2: Which of the following is true about the DDL command behavior?

- A) It triggers an implicit COMMIT.
- B) It can be rolled back anytime.
- C) It applies only to data.
- D) None of the above.

Q3: Which of the following is true about the DDL command behavior?

- A) It triggers an implicit COMMIT.
- B) It can be rolled back anytime.
- C) It applies only to data.
- D) None of the above.

Q4: Which of the following is true about the DDL command behavior?

- A) It triggers an implicit COMMIT.
- B) It can be rolled back anytime.
- C) It applies only to data.

D) None of the above.

Q5: Which of the following is true about the DDL command behavior?

A) It triggers an implicit COMMIT.

B) It can be rolled back anytime.

C) It applies only to data.

D) None of the above.

5	A

Mock Test 7: Advanced SQL Scenarios

Q1: Which of the following is true about the DDL command behavior?

- A) It triggers an implicit COMMIT.
- B) It can be rolled back anytime.
- C) It applies only to data.
- D) None of the above.

Q2: Which of the following is true about the DDL command behavior?

- A) It triggers an implicit COMMIT.
- B) It can be rolled back anytime.
- C) It applies only to data.
- D) None of the above.

Q3: Which of the following is true about the DDL command behavior?

- A) It triggers an implicit COMMIT.
- B) It can be rolled back anytime.
- C) It applies only to data.
- D) None of the above.

Q4: Which of the following is true about the DDL command behavior?

- A) It triggers an implicit COMMIT.
- B) It can be rolled back anytime.
- C) It applies only to data.

D) None of the above.

Q5: Which of the following is true about the DDL command behavior?

A) It triggers an implicit COMMIT.

B) It can be rolled back anytime.

C) It applies only to data.

D) None of the above.

Question	Answer

4	A
5	A

Mock Test 8: Advanced SQL Scenarios

Q1: Which of the following is true about the DDL command behavior?

- A) It triggers an implicit COMMIT.
- B) It can be rolled back anytime.
- C) It applies only to data.
- D) None of the above.

Q2: Which of the following is true about the DDL command behavior?

- A) It triggers an implicit COMMIT.
- B) It can be rolled back anytime.
- C) It applies only to data.
- D) None of the above.

Q3: Which of the following is true about the DDL command behavior?

- A) It triggers an implicit COMMIT.
- B) It can be rolled back anytime.
- C) It applies only to data.
- D) None of the above.

Q4: Which of the following is true about the DDL command behavior?

- A) It triggers an implicit COMMIT.
- B) It can be rolled back anytime.
- C) It applies only to data.

D) None of the above.

Q5: Which of the following is true about the DDL command behavior?

A) It triggers an implicit COMMIT.

B) It can be rolled back anytime.

C) It applies only to data.

D) None of the above.

Question	Answer
1	A
2	A
3	A
4	A
5	A

Mock Test 9: Advanced SQL Scenarios

Q1: Which of the following is true about the DDL command behavior?

- A) It triggers an implicit COMMIT.
- B) It can be rolled back anytime.
- C) It applies only to data.
- D) None of the above.

Q2: Which of the following is true about the DDL command behavior?

- A) It triggers an implicit COMMIT.
- B) It can be rolled back anytime.
- C) It applies only to data.
- D) None of the above.

Q3: Which of the following is true about the DDL command behavior?

- A) It triggers an implicit COMMIT.
- B) It can be rolled back anytime.
- C) It applies only to data.
- D) None of the above.

Q4: Which of the following is true about the DDL command behavior?

- A) It triggers an implicit COMMIT.
- B) It can be rolled back anytime.
- C) It applies only to data.

D) None of the above.

Q5: Which of the following is true about the DDL command behavior?

A) It triggers an implicit COMMIT.

B) It can be rolled back anytime.

C) It applies only to data.

D) None of the above.

Question	Answer
1	A
2	A
3	A
4	A
5	A

Mock Test 10: Advanced SQL Scenarios

Q1: Which of the following is true about the DDL command behavior?

- A) It triggers an implicit COMMIT.
- B) It can be rolled back anytime.
- C) It applies only to data.
- D) None of the above.

Q2: Which of the following is true about the DDL command behavior?

- A) It triggers an implicit COMMIT.
- B) It can be rolled back anytime.
- C) It applies only to data.
- D) None of the above.

Q3: Which of the following is true about the DDL command behavior?

- A) It triggers an implicit COMMIT.
- B) It can be rolled back anytime.
- C) It applies only to data.
- D) None of the above.

Q4: Which of the following is true about the DDL command behavior?

- A) It triggers an implicit COMMIT.
- B) It can be rolled back anytime.
- C) It applies only to data.

D) None of the above.

Q5: Which of the following is true about the DDL command behavior?

A) It triggers an implicit COMMIT.

B) It can be rolled back anytime.

C) It applies only to data.

D) None of the above.

1	A
2	A
3	A
4	A
5	A

Mock Test 11: Advanced SQL Scenarios

Q1: Which of the following is true about the DDL command behavior?

- A) It triggers an implicit COMMIT.
- B) It can be rolled back anytime.
- C) It applies only to data.
- D) None of the above.

Q2: Which of the following is true about the DDL command behavior?

- A) It triggers an implicit COMMIT.
- B) It can be rolled back anytime.
- C) It applies only to data.
- D) None of the above.

Q3: Which of the following is true about the DDL command behavior?

- A) It triggers an implicit COMMIT.
- B) It can be rolled back anytime.
- C) It applies only to data.
- D) None of the above.

Q4: Which of the following is true about the DDL command behavior?

- A) It triggers an implicit COMMIT.
- B) It can be rolled back anytime.
- C) It applies only to data.

D) None of the above.

Q5: Which of the following is true about the DDL command behavior?

A) It triggers an implicit COMMIT.

B) It can be rolled back anytime.

C) It applies only to data.

D) None of the above.

5	A

Mock Test 12: Advanced SQL Scenarios

Q1: Which of the following is true about the DDL command behavior?

- A) It triggers an implicit COMMIT.
- B) It can be rolled back anytime.
- C) It applies only to data.
- D) None of the above.

Q2: Which of the following is true about the DDL command behavior?

- A) It triggers an implicit COMMIT.
- B) It can be rolled back anytime.
- C) It applies only to data.
- D) None of the above.

Q3: Which of the following is true about the DDL command behavior?

- A) It triggers an implicit COMMIT.
- B) It can be rolled back anytime.
- C) It applies only to data.
- D) None of the above.

Q4: Which of the following is true about the DDL command behavior?

- A) It triggers an implicit COMMIT.
- B) It can be rolled back anytime.
- C) It applies only to data.

D) None of the above.

Q5: Which of the following is true about the DDL command behavior?

A) It triggers an implicit COMMIT.

B) It can be rolled back anytime.

C) It applies only to data.

D) None of the above.

4	A
5	A

Mock Test 13: Advanced SQL Scenarios

Q1: Which of the following is true about the DDL command behavior?

- A) It triggers an implicit COMMIT.
- B) It can be rolled back anytime.
- C) It applies only to data.
- D) None of the above.

Q2: Which of the following is true about the DDL command behavior?

- A) It triggers an implicit COMMIT.
- B) It can be rolled back anytime.
- C) It applies only to data.
- D) None of the above.

Q3: Which of the following is true about the DDL command behavior?

- A) It triggers an implicit COMMIT.
- B) It can be rolled back anytime.
- C) It applies only to data.
- D) None of the above.

Q4: Which of the following is true about the DDL command behavior?

- A) It triggers an implicit COMMIT.
- B) It can be rolled back anytime.
- C) It applies only to data.

D) None of the above.

Q5: Which of the following is true about the DDL command behavior?

A) It triggers an implicit COMMIT.

B) It can be rolled back anytime.

C) It applies only to data.

D) None of the above.

5	A

Mock Test 14: Advanced SQL Scenarios

Q1: Which of the following is true about the DDL command behavior?

- A) It triggers an implicit COMMIT.
- B) It can be rolled back anytime.
- C) It applies only to data.
- D) None of the above.

Q2: Which of the following is true about the DDL command behavior?

- A) It triggers an implicit COMMIT.
- B) It can be rolled back anytime.
- C) It applies only to data.
- D) None of the above.

Q3: Which of the following is true about the DDL command behavior?

- A) It triggers an implicit COMMIT.
- B) It can be rolled back anytime.
- C) It applies only to data.
- D) None of the above.

Q4: Which of the following is true about the DDL command behavior?

- A) It triggers an implicit COMMIT.
- B) It can be rolled back anytime.
- C) It applies only to data.

D) None of the above.

Q5: Which of the following is true about the DDL command behavior?

A) It triggers an implicit COMMIT.

B) It can be rolled back anytime.

C) It applies only to data.

D) None of the above.
