

Database Design Workbook

Hands-On Exercises (10 Pages)

Design Challenge 1

Scenario: You are tasked with designing a schema for a new startup. Define the primary keys, data types, and constraints required for this module.

Table Name: _____

Columns & Types:

1. _____

2. _____

3. _____

4. _____

Constraints Applied: _____

Design Challenge 2

Scenario: You are tasked with designing a schema for a new startup. Define the primary keys, data types, and constraints required for this module.

Table Name: _____

Columns & Types:

1. _____

2. _____

3. _____

4. _____

Constraints Applied: _____

Design Challenge 3

Scenario: You are tasked with designing a schema for a new startup. Define the primary keys, data types, and constraints required for this module.

Table Name: _____

Columns & Types:

1. _____

2. _____

3. _____

4. _____

Constraints Applied: _____

Design Challenge 4

Scenario: You are tasked with designing a schema for a new startup. Define the primary keys, data types, and constraints required for this module.

Table Name: _____

Columns & Types:

1. _____

2. _____

3. _____

4. _____

Constraints Applied: _____

Design Challenge 5

Scenario: You are tasked with designing a schema for a new startup. Define the primary keys, data types, and constraints required for this module.

Table Name: _____

Columns & Types:

1. _____

2. _____

3. _____

4. _____

Constraints Applied: _____

Design Challenge 6

Scenario: You are tasked with designing a schema for a new startup. Define the primary keys, data types, and constraints required for this module.

Table Name: _____

Columns & Types:

1. _____

2. _____

3. _____

4. _____

Constraints Applied: _____

Design Challenge 7

Scenario: You are tasked with designing a schema for a new startup. Define the primary keys, data types, and constraints required for this module.

Table Name: _____

Columns & Types:

1. _____

2. _____

3. _____

4. _____

Constraints Applied: _____

Design Challenge 8

Scenario: You are tasked with designing a schema for a new startup. Define the primary keys, data types, and constraints required for this module.

Table Name: _____

Columns & Types:

1. _____

2. _____

3. _____

4. _____

Constraints Applied: _____

Design Challenge 9

Scenario: You are tasked with designing a schema for a new startup. Define the primary keys, data types, and constraints required for this module.

Table Name: _____

Columns & Types:

1. _____

2. _____

3. _____

4. _____

Constraints Applied: _____

Design Challenge 10

Scenario: You are tasked with designing a schema for a new startup. Define the primary keys, data types, and constraints required for this module.

Table Name: _____

Columns & Types:

1. _____

2. _____

3. _____

4. _____

Constraints Applied: _____

Design Challenge 11

Scenario: You are tasked with designing a schema for a new startup. Define the primary keys, data types, and constraints required for this module.

Table Name: _____

Columns & Types:

1. _____

2. _____

3. _____

4. _____

Constraints Applied: _____
